

Nifty100 Financial Intelligence Platform - Analyst Guide

1. Project Overview

The Nifty100 Financial Intelligence Platform provides financial analysis, stock screening, company comparison, valuation analysis, cash flow intelligence, sector analysis, NLP-based insights, PDF reports, and an interactive dashboard.

2. Company Analysis

Use the Company Profile module to review company information, financial metrics, ratios, performance indicators, and other available analytical data.

3. Stock Screener

Use the Stock Screener to filter companies using metrics such as Return on Equity (ROE), Debt-to-Equity ratio, and sector-based filters.

4. Peer Comparison

Use Peer Comparison to compare companies with other companies in their peer group using available financial and performance metrics.

5. Sector Analysis

Use Sector Analysis to review sector-level company information and aggregated financial metrics.

6. Valuation Analysis

The Valuation Engine generates valuation outputs and identifies companies that may require further analyst review.

7. Cash Flow Intelligence

Cash Flow Intelligence analyzes financial cash flow information and generates patterns, alerts, and analytical outputs.

8. Reports

The platform can generate company tearsheets, sector reports, portfolio summary reports, and other analytical outputs.

9. API Usage

FastAPI endpoints provide access to company, screener, sector, and health-related data for programmatic use.

10. Testing

Run the automated test suite before submitting or deploying changes. The project test suite validates ETL, data quality, KPI calculations, and API functionality.
